

Morey Hosts Fall and Spring Student Intersessions

Intersession – Every student at Morey will participate in an intersession. An intersession is an opportunity for students to participate in academic exploration and experiential learning. They might explore or address a burning question, interest, idea or concept in different ways. It is an opportunity for teachers and staff to steer away from the current curriculum and do something entirely different and unrelated. We have a two-day intersession in October and a four-day intersession in April. These experiences range from rock climbing to out of state trips for our students. School-wide fundraisers are held to support these fantastic opportunities for our students.

Students may also participate in out of state trips during the spring intersession. These trips currently include Washing DC/New York City for 8th graders and Seacamp Science Camp in San Diego, California. Sixth graders may participate in our Keystone Science Camp in Keystone, Colorado.

Rock Climbing/Camping Trip
